

RELOVED — PLAN OF ACTION (Friends & Family)

Target: Test-ready by Friday, 18 Sep 2026

Direction: Lock the base launch flow, finish critical UX/functional changes, test end-to-end, put the build in users' hands by Friday.

P0 — Must complete before Friday

- Location-based Wall (~3 km nearby-first); broad locality public; live map; seed ~Being Matched social proof
- Claim → Accept/Decline(+reason) → Match → Handover → Received → Reloved
- Soft messaging (never Rejected); in-app primary + email fallback
- Handover + ONE prepaid courier path (Borzo, no COD)
- Privacy: exact address only at handover; authenticity disclaimer
- Onboarding: kids size not forced; delete own listing; multi-photo + swipe
- Admin/seeded inventory ownership + QC
- Support chat: preset questions + human email escalation
- Call masking E2E
- Upload stability (higher multi-file limits)

UX polish

- Statuses: Available / Being Matched / Reloved
- Remove For You badges
- Weekly 3-item claim limit for pilot

Timeline

Wed 16: Development closure of all P0s.

Thu 17: Integration + full giver/claimer QA (see Docs/F&F;_QA_CHECKLIST.md).

Fri 18: Regression + share F&F; build (see Docs/F&F;_RELEASE_NOTES.md).

Phase 2 — Safe public-launch integrations (OUT of Friday sprint)

Rule: F&F; uses handover OR one prepaid Borzo path. Phase 2 locks exactly ONE courier (Borzo OR Porter — not both) and deep-integrates it.

- Choose ONE courier and deep-integrate (estimate/book/track/cancel)
- Auto status sync + live tracking
- Prepaid lock + payer/subsidy rules after F&F; observation
- Failure/no-show/cancel/return recovery
- Call masking + notification hardening at scale
- Address/thrift abuse guards + full ops console
- Public launch readiness checklist
- Growth later: SEO, analytics, native app

Definition of Done — Friday

Drop → Location discovery → Claim → Accept/Decline → Match → Chat/Notifications → Handover/Delivery → Received → Reloved — with privacy, mobile, admin, notification, upload, support chat, and call-masking verified.
