

What reloved costs, and at what point it starts costing more.

Every paid service behind reloved — fixed vs. usage-based — modelled at five active-user tiers. Each tier column is a standalone snapshot of that many total active users in one month, not a cumulative count.

Prepared for **Sheetal Ahuja** Prepared by **Totem Interactive** Date **20 Aug 2026, rev.**

Fixed costs — confirmed actuals

Domain (reloved.digital)	₹398/yr
cPanel hosting (API, database, photo disk, mailboxes)	₹2,388/yr
Fixed total	₹2,786/yr (~₹232/mo)

Billed yearly, not monthly. No Cloud Run / Cloud SQL / Cloud Storage in this model — cPanel replaces all three.

Usage-based costs, by active-user tier

SERVICE	100	500	1,000	5,000	10,000
Email (Brevo) — ~4/user/mo, free ≤9,000/mo	free	free	free	~₹1,800	~₹3,500
SMS/OTP (MSG91) — no free tier	~₹10–20	~₹50–100	~₹100–200	~₹500–1,000	~₹1,000–2,000
AI photos (Gemini) — token cost only*	free	~₹15	~₹25	~₹125	~₹250
Maps (MapTiler) — ~1 session/user/mo, live now**	free	free	free	~₹2,490	~₹2,490
Usage-based subtotal	~₹10–20	~₹65–115	~₹125–225	~₹4,915–5,415	~₹7,240–8,240

*Gemini "free" = ₹0 token cost, not unlimited requests. **MapTiler's key is already live in production (homepage Impact Map) — free tier is 5,000 sessions/mo, paid Flex is a flat \$30/mo (~₹2,490). See notes overleaf. Photo storage (cPanel disk, ~15,000–17,000 photos ≈ 5GB) is included in hosting, not metered here.

Total estimated monthly cost, by scale

	100	500	1,000	5,000	10,000
Fixed (₹2,786/yr, as monthly-equiv.)	₹232	₹232	₹232	₹232	₹232
Usage (Brevo + MSG91 + Gemini + MapTiler)	₹10–20	₹65–115	₹125–225	₹4,915–5,415	₹7,240–8,240
Estimated total — live today	~₹242–252	~₹297–347	~₹357–457	~₹5,147–5,647	~₹7,472–8,472
+ Borzo, roadmap placeholder ¹	₹3,000	₹3,000	₹3,000	₹3,000	₹3,000
Grand total, incl. Borzo	~₹3,242–3,252	~₹3,297–3,347	~₹3,357–3,457	~₹8,147–8,647	~₹10,472–11,472

¹Flat across every column on purpose — Borzo cost scales with pickups booked, not MAU, so this is a placeholder, not a per-tier estimate. Live-today: ~\$3/mo at pilot rising to ~\$90–102/mo at 10,000 MAU. Incl. Borzo: ~\$39/mo at pilot rising to ~\$126–138/mo at 10,000 MAU.

Borzo delivery pickup

ROADMAP

Subscription	₹0/mo
Per-delivery	~₹40+
Scales with	Distance, size, urgency
API access	Business acct, sales-assisted

Planning estimate (50/mo) ~₹3,000/mo

Not live yet — Give flow shows it as "Coming soon." Records donor interest, doesn't book anything.

Where free tiers run out

Brevo (email)	~2,250 MAU
MapTiler (maps)	~5,000 MAU
MSG91 (SMS/OTP)	Day one
Gemini (AI photos)	First upload burst
Domain + cPanel	Day one (fixed)

The two real cost jumps are MapTiler at ~5,000 MAU and Brevo at ~2,250 MAU — everything below that stays close to the ~₹232/mo floor.

Key notes

- **MapTiler is already live — the others aren't.** The homepage's Impact Map uses a real MapTiler key today, metering free-tier map sessions on every visit. Brevo and MSG91 are switched off until email/OTP go live; MapTiler isn't waiting on anything.
- **Gemini isn't really an MAU risk.** Admin bulk-upload sends up to 20 photos to Gemini at once, unthrottled — one batch alone can exceed the free tier's ~10–15 requests/minute limit. That's why a billed key is budgeted from 500 MAU on in the table above, even though it stays under ₹250/mo even at 10,000 MAU. It's a reliability fix, not a cost jump.
- **MSG91 is shown as a range, not a point estimate.** Donor logins are OTP-only with a 7-day session token. Heavy users who re-verify weekly (switching devices, checking back often) roughly double the blended SMS cost versus the base ~1-OTP-per-2-users/month assumption — the range above spans both cases.
- **Each tier column stands alone.** "1,000 MAU" means a month with 1,000 total active users, not 500 plus 500 more stacked on top of the column before it.
- All figures are modelled estimates from published vendor pricing (Aug 2026), not vendor quotes — confirm live pricing before committing budget. Exclusive of GST if applicable.

reloved · cost model, prepared for internal & client review · Domain and cPanel hosting are confirmed actuals; Brevo, MSG91, Gemini, MapTiler and Borzo figures are modelled/placeholder estimates, not vendor quotes. MapTiler is already live in production.
